What is one thing that made the most impact on you?

• Before I used to believe that I can do it all alone, and after the training I understand that team work is about solving problems.

• Before the training I thought it was okay to pursue self success more but after the training I realized team win should be the ultimate goal as an employee or employer.

• Before the training I didn't know I was a supporter

• Before the training, I had issues with communication with some people. After the training and self discovery I know how to handle conversations better

• Knowing the type of person I am in the work environment.
### Testimonials

- The training was insightful and practical

- It was indeed impactful. I had such a great time! Kamil was a sweetheart and he was super friendly and funny but also very smart and knowledgeable about what he was talking about. I definitely would like to be in another training of his

- Loved it. Made me see parts of me I didn't realise before and how I fit in a team

- The training really changed me from who I was before. With this training I believe I will join hands with my team members to bring positive impact to the workplace

- It is one of the best things and training I have ever attended. It gives you real life applicable nuggets

- I came into the training thinking it was going to be one of those times where someone comes and tells you everything and talk for hours without any real life connection but it was far from that. I left there understanding my colleagues better and now I know how each person functions and how well I can utilise their strengths.

- The training made me see my team and boss differently, I used to just want to do my job and move along. After the training I realized that when your team wins it's more weighty than when you win alone so team win is now what I am more passionate about as against self victory.

- Great experience

**Connecting You To New and Higher Possibilities**
I am a connectologist. Since 2002, I have been studying and practicing the act of connectology which is the connecting of two or more people for the purpose of sharing ideas, information and resources to create WIN WIN outcomes. In English, many call this “networking for success” but at MIPAD, the World's #1 EXCELLENCE Network, we call this connectology!
